July 30, 2020

Dear Valued Welded Tube of Canada Corp. customer,

Welded Tube is committed to providing quality excellence in product quality, service and ultimate value to a diversified customer base that meet the environmental regulations, including EU Directive 2002/95/EC and subsequent amendments of the European Parliament and of the Council of the use of certain hazardous substances REACH (Registration, Authorisation and Restriction of Chemicals, European Union Regulation (EC) 1907/2006).

REACH Compliance

Welded Tube believes that even though REACH is an EU regulation, our products are affected in all geographical regions. We are constantly monitoring and verifying that our products do not contain the substances of very high concern (SVHC's) as defined by REACH. This will be an ongoing process since the complete list of SVHC's changes and is released in stages.

Our customers are encouraged to visit the following site to get the most up to date information on current list of SVHC's under REACH <https://echa.europa.eu/candidate-list-table>. The most recent changes to the Substances List added 4 new substances of concern as of June 2020.

Welded Tube's products do not contain SVHC's above the threshold value defined by ECHA as of the date of this letter.

The environmental regulations change constantly. We will try our best to keep you informed of changes that affect Welded Tube products by periodically updating this letter.

We thank you for your continued support and understanding.

Blake Roussell
Quality, Health & Safety, Environmental Manager
